i (a chad rogue enjoyer) like when
scabbs (the funnest card to ever card)
is totally broken and enables my class
(its the best class and has the
prettiest skins) to be the only viable
meta choice. when scabbs gets nerfed
(fuck blizzard how dare they) and
rogue is no longer t0, other people
(yuck) get to play other classes they

Note: Although prep reduces the cost of Bounce by 2, you still only accelerate the combo by 1 mana due to the nature of Shark / Foxy gatekeeping you at 6 mana if you haven't shadowstepped one of them previously	Second Note: You have to use Shark > Foxy as the beginning of the opener here and not Shark > Darkscale because otherwise Scabbs will discount your BAWG and your prep will not have done anything and your combo won't be discounted
Shark (4) / Darkscale (1, Refreshes 4) / Foxy (2) / Scabbs / ETC (Bounce, Demise) / Bounce	Note: Use whichever of these two openers that takes advantage of the minion you shadowstepped previously. Whichever minion that is should be the card played right after Shark
Note: This only works if you stepped Foxy and not Darkscale because Shark / Stepped Foxy is 4 mana whereas Shark / Stepped Darkscale is 5 mana	Second Note: You have to coin later into the opener if you do this with 4 max mana crystals because Darkscale refreshes mana instead of gaining it so you need to delay the coin until right before Bounce to ensure you have 5 mana to play Bounce (3) / Shark (1) / Darkscale (1, Refreshes 4)
Note: This only works if you stepped Foxy and not Darkscale because Shark / Stepped Foxy is 4 mana whereas Shark / Stepped Darkscale is 5 mana
